AWARDS, SKILLS & INTERESTS

- *Experience with:* Linux, Tableau, AWS, Git/GitHub, SQLite, SnowFlake, dbt (data build tool)
- *Coding Languages:* R, Python, SQL, VBA
- *BYU Clubs:* Statistics Association, Data Science Association, Artificial Intelligence Association
- *Proficient in Microsoft Office applications* (Word, Excel, PowerPoint)

EDUCATION

Brigham Young University– Computational, Mathematical, and Physical Sciences *Provo, UT*
Bachelor of Science, Statistics: Data Science, Minors: Information Systems, Mathematics *Sep 2023 – Apr 2027*

Applicable Coursework

- Math: Calculus 1 & 2, Linear Algebra, Statistical Modeling 1 & 2, Probability and Inference 1 & 2
- Business: Principles of Accounting, Principles of Finance, Econ Principles & Problems

Other Skills

- Python: Proficient in computationally heavy methods and web scraping (NumPy, Pandas, SciPy, Matplotlib, bs4)
- R: Statistical modeling and data visualization (Quarto for report writing and automation)
- Excel: Experienced in built-in methods as well as VBA (Openpyxl for python integration)

EXPERIENCE

ProdataKey *Draper, UT*
Data Analyst Intern *May 2026 – Present*

- Gathered requirements from Sales leadership and built a multi-window OLS trend engine on monthly dealer growth data to classify Slowing, Recovering, and Dormant accounts; validated with unit tests
- Shipped an end-to-end dbt + Snowflake pipeline (SQL macros, Snowpark Python, incremental history, latest views) with schema tests
- Delivered Tableau dashboards on precomputed Snowflake trend data with list, detail, and timeline views joined to Salesforce dealer dimensions
- Implemented PII tagging in dbt by documenting and classifying sensitive fields in sources and seeds to improve the organization's SOC 2 privacy processes

Brigham Young University, Marriott School of Business (Strategic Management Department) *Provo, UT*
Research Assistant *Apr 2025 – May 2026*

- Proofread statistical components of curriculum and research articles
- Migrated a large-scale database from Snowflake to the Linux based university supercomputer
- Analyzed cooperative research survey data using Multinomial Logistic Regression and Ordinal Logistic Regression to gain insights into employee perception towards AI based on various factors

Brigham Young University, Marriott School of Business (ILABZ) *Provo, UT*
Computer Programmer (front-end) *Mar 2024 – Apr 2025*

- Built components in React using Typescript as a part of a 7-member team
- Built and maintained 5 learning-oriented web applications to teach about markets and trade between cultures

LEADERSHIP & SERVICE

The Church of Jesus Christ of Latter-day Saints *Raleigh, NC*
Volunteer Representative *Aug 2021 – Aug 2023*

- Served for 2 years supporting community organizations and individuals in need
- Managed social media initiatives
